Case Study

Fox ESS 8.2kW Battery Storage System

Mr Hagland – Birtley

Mr Hagland approached us for a quote after noticing a substantial increase in his energy exportation. Mr Hagland already owned a previously installed Solar Photovoltaic System for many years when he enquired about a Battery Storage System.

The aim of this Battery System was to capture and store his unused energy to not only further reduce his energy bills but also his Carbon Footprint. To achieve this, Sustainable Energy Engineering retrofitted a Fox ESS Cube 8.2kW Lithium-Ion Battery System complete with a Fox ESS 3.6kW AC Charger Inverter.

APPROVED
INSTALLER

Customer: Mr Hagland

Location: Birtley

Scope of Work: Fox ESS 8.1kW Cube Lithium-Ion Battery with Fox ESS 3.6kW AC Charger Inverter

Date Installed: January 2023
